TECHNICAL SKILLS

- Full-Stack, Front-end & Back-end development
- Object-Oriented Programming
- Project Management
- Microservices
- Event-Driven and Messaging Architecture
- Relational Database Design and Optimization
- Cloud Services & DevOps
- Agile / Scrum Delivery
- Reporting & Data Visualization
- External System Integration
- Automated Testing
- Knowledge on Financial & Accounting principles

TECHNOLOGIES

- .NET Core, C#, VB.NET, ASP.NET MVC
- REST API, Web Services, WCF Services
- React, Node, JavaScript, TypeScript, Python
- CSHTML, Bootstrap, CSS, jQuery, JSON/XML
- SQL Server, ADO.NET, Entity Framework, Oracle, MongoDB, PL/SQL
- OAuth, JWT
- Microsoft Azure, AWS, Docker, DevOps, GitHub, GitLab, CI/CD
- Azure Service Bus, Kafka
- SAP Crystal & SSRS Reports
- Java

AI DEVELOPMENT TOOLS

- GitHub Copilot
- Claude Code
- ChatGPT

PROFESSIONAL SUMMARY

Senior Software Developer with over 9 years of experience designing, developing, and delivering large-scale distributed applications across finance, travel, retail, inventory, and CRM domains. Strong expertise in modern JavaScript frameworks, backend system architecture, and cloud-based solutions.

CORE COMPETENCIES

- Good programming, ambitious, analytical, problem-solving, interpersonal, and collaboration skills.
- Time management – organizing, planning, and delivering projects on time.
- Proven experience leading projects with commitment and managing multiple tasks simultaneously.
- Initiative-taking, capable of working independently, and contributing as both a productive team member and a leader.
- Cheerful outlook, self-motivated, and an adaptive learner, with a strong willingness to adapt to new challenges and technologies.

EDUCATION

- MSc in Software, Web, & Cloud | Tampere University
  - Aug 2024 – May 2026 — Tampere, Finland
- B.Tech in Computer Science and Engineering | SIETK College
  - Aug 2006 – Jun 2010 — Puttur, Andhra Pradesh, India
- Diploma in Java Technology (Oracle Certified Professional) | NIIT
  - Jan 2012 - Apr 2012 — Chennai, Tamil Nadu, India

PROFESSIONAL EXPERIENCE

Senior .NET Developer | Diyar United Company

Aug 2022 - Present — Kuwait City, Kuwait

- Developed and deployed scalable web applications using .Net/.NetCore, Azure and Docker, ensuring high performance and reliability
- Build dynamic, cost-effective and interactive user interfaces using React and JavaScript
- Enhanced reports using SSRS (SQL Server Reporting Services)
- Debug and expand existing projects, resolving issues raised by the production team by following security standards.
- Mentored and trained junior developers while maintaining regular communication with management and technical support teams.

Senior Software Developer | Tracom Solutions

Sep 2014 - Jul 2022 — Fahaheel, Kuwait

- Examined user requirements and converted them into design documents.
- Implemented and tested Windows and web applications using .NET technology.
- Built reports using SAP Crystal Reports.
- Designed database schemas, tables, triggers, functions, and stored procedures.
- Integrated with external APIs such as travel booking engines, SMS services, and payment gateways.
- Provided client assistance, troubleshooting issues and ensuring seamless solutions.

TOOLS & PLATFORMS

Programming
Visual Studio 2022, VS Code, IntelliJ

Source Control
GIT, VSS, TFS

Reports
SAP Crystal Report, SSRS

Backend
SQL, Oracle, PL/SQL

Web Servers
IIS, Azure , AWS Cloud Servers,

Testing Tools
SOAP, Postman, Talend API, WCF Test Client

ADDITIONAL INFORMATION

Location: Tampere, Finland

Work Authorization: Eligible to work in Finland

PROJECTS

- React Server Components Performance Evaluation| MSc Thesis

  Evaluated performance of React Server Components vs CSR and SSR using Core Web Vitals, demonstrating improved scalability, hydration and reduced JavaScript bundle size.

- Green Choices for Logistics | Demola

  Analyzed fuel consumption and CO2 emissions to optimize logistics efficiency and reduce environmental impact.

- Consumer and Station Management System (CSMS) | TASMU

  CSMS is a web application used by electric vehicle charging stations to manage user profiles, service providers, stations, charge points, and connectors.

- Customer and Card Management System (CMS) | WOQOD

  CMS is a complete software solution that helps users in managing the customer's profiles, petrol card profiles, customer's payments, card deliveries etc.

- Merchant Management System (MMS) | Diyar United

  MMS is a software solution which manages merchant profiles and transaction receipts.

- Inventory Management System (IMS) | Petpoint

  IMS is an inventory management system that tracks all goods throughout the entire supply chain from purchasing to sales.

- Customer Relationship Management (CRM) | Tracom Solutions

  CRM is an in-house application that manages client data, records communication, and tracks client requests along with status and payment history.

- Call Logger | Galileo

  Call Logger is an inventory management system that manages both hardware and software assets and streamlines the monitoring and maintenance of stocked products.

- Airline Booking System (ABS) | Como and Kuwaitstar Travels

  ABS is a Windows-based application that manages stock and bookings of airlines andhotels for travel agencies. It incorporates airline schedules, pricing modules, and passenger modules.

- Document Management System (DMS) | Horizon Travels

  DMS is a web application used to track, manage, and store documents digitally to reduce paper usage.

- HR Management System (ATOMS) | Al-rashed and Jumbo Travels

  ATOMS is a complete HR system that maintains easy payroll processing with allowance and deduction automation, attendance management, employee growth history management, air passage, indemnity calculators, and accounting effects.

- FIESTA | Product of Tracom Solutions

  Optimized and supported FIESTA, an enterprise back-office accounting system for travel companies. Increased accounting accuracy by 20% and reporting efficiency for management decisions.
